1 □ □ B O O K S □ Many , many years ago a town
crier ran through the streets and
shouted out all the news . But now we
live in the Atomic Age . Too many
things happen too quickly for us to
learn about them in the old-fashioned way . That is
why we have to read more and more in order to find out what is happening
in the world . Reading is rarely a waste of time . □ Have you ever thought
about the kind of books people used long ago ? It is only in the last 500
years that books have been printed on paper . Before that time the only
way of making books was to write them out by hand . No one knows when
writing first began ,

drawings on the walls of caves and
scratchings on bones which are at
least 25,000 years old. □ The
invention of paper played a very
important part in the development of
books. □ In the 11th century the art
of papermaking reached Europe but no
trace of printing was found in
Europe until 1423. It is known that
Johann Gutenberg secretly tried out
ways of printing in Strasbourg,
Germany, in 1440. The knowledge of
the methods of printing spread so
quickly over the Continent of Europe
that by the year 1487 nearly every
country had started printing books.
Later people began to learn how to
make paper more quickly and cheaply
and of better quality. As a result
of this, books became much lighter
and smaller. □ The first person to
print books in the English language
was William Caxton, in Russia □ Ivan
Fedorov. The first book printed in
the Russian language appeared in
Moscow on the first of March, 1564.
Up to that time there were only
handwritten books in Russia. The
house built for printing books was
not far from the Kremlin. At that
time it was one of the best
buildings in the Russian capital.
Ivan Fedorov and his assistants were
the first to use Russian letters.
□ By the 16th century books looked
very much as they do today and since
then very little change has been
made in their appearance. □ □ -□ B 2 □ 5 □ B □ L □ B □ 5 □
